

Underride

Somewhere between metal and punk there exists a handful of bands that embody the edge and attitude of rock. Stripped down to the basics, Underride feeds your appetite for distortion. Underride draws its influences from the long tradition of American heavy rock including Guns N Roses, Buckcherry, Velvet Revolver and the Foo Fighters.

"Underride both live and on disc are Rock n Rolla outta control!! Once you hear them you too will be a believer. Underride makes you want to grab life by the throat and maybe leave a bruise."

-Jolene KISW 99.9 jock Entercom

Underride has established themselves as one of Seattle's top drawing acts for original rock. Their growing online presence and fan base of more than 5,000 "true" MySpace fans has generated over 5,000 unit sales, 500 daily spins and 64,000 total spins.

Reviews of their most recent release *One of Us*, have been overwhelmingly positive. One review proclaimed:

"This CD has more hooks than a goddamn tackle-box!"

-Torch, Editor Rock and a Hard Place
